

Preparing Our Communities to Address the

CLIMATE CRISIS

Science Leads the Way

A PART OF #USCLIMATEACTIONWEEK

APRIL 19-23
US CLIMATE ACTION WEEK
Convened by
CLIMATE GROUP

According to the Climate Group, science says that we must cap global warming at 1.5°C to avoid the disastrous effects of climate change. To be in with a fighting chance, we must halve global emissions in the next ten years—that is why the 2020s must be the Climate Decade. To that end, Career Communications Group (CCG) is joining the network of 300 multinational businesses to host a panel discussion on how we can begin to prepare our communities to “Stand Up, Step Up, and Make the Change” for a better, cleaner, and safer tomorrow. Join us to address the climate crisis with science and technology leading the way.

April 20, 2021 • 11:00am – 12:00pm

Hosted by
Career Communications Group, Inc.

Session Moderated by:

Anthony Kinslow II, Ph.D.
CEO and Founder, Gemini Energy Solutions
